Keeway RKF 125cc E5 2021

New Euro 5 2021 model Naked Sports Geared 125cc Learner Legal
Motorcycle

£2,799 ^{+OTR}
from **£56.02** p/m

With its edgy and eye-catching look, RKF 125cc is the new naked Keeway with a unique, modern personality. RKF is a sleek and extremely dynamic smart bike, designed to provide maximum fun in the curves. Its heart is the new single-cylinder, four-stroke, liquid-cooled 125 cc engine offering excellent street performance. Its maximum power is 9 kW at 9500 rpm, with torque of 10 Nm at 7500 rpm. As a result of the partnership with Storied Italian Manufacturer Benelli, RKF benefits from the latest in Multi Valve, Multi Spark engine BMT technology to achieve higher fuel efficiency. ?Lean combustion without sacrificing power is achieved by mixing fuel and air above the theoretical air-fuel ratio (14.7:1). But too lean a fuel and air mixture is not an easy task to ignite. The BMT power platform adopts a higher compression ratio, and the temperature of the mixture is higher and easier to ignite when the piston reaches the top dead centre, literally more Bang for your Buck! With the fitment of USD forks as standard a refined comfort level that feels like it belongs to larger super-sport machines is achieved. The BMT engine platform, together with the engine technology from the century-old Benelli, has a number of technical advantages in engine platform(such as multi-valve multi-spark plug) . The BMT power platform is mainly represented by high-speed, high-power, high-performance engines, and is equipped with high-end personalized and sporty models of Benelli. At present, the BMT power platform mainly focuses on small displacements below 250cc motorcycle engine. It will gradually expand to small displacement scooter engines and cub engines.
